

Part 1: Prepping Kodi, version number and clearing data

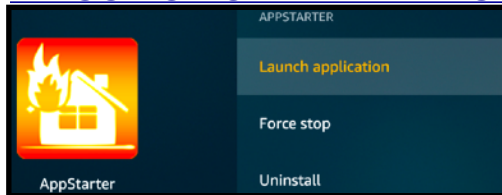

1. Reboot the device
2. Navigate to “Settings” —> “Applications” —> “Managed Installed Applications” —> “Kodi”, select it.
3. Navigate and select “Clear data” —> “Clear data” again to confirm.

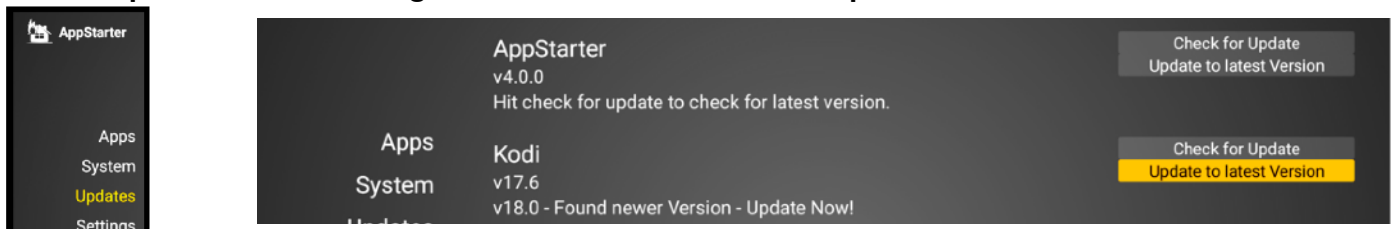

Part 2: Kodi software update using “AppStarter”

1. Reboot the Amazon device, go to “Settings” —> “Applications” —> “Manage Installed Applications” —> “AppStarter” —> “Launch application”.

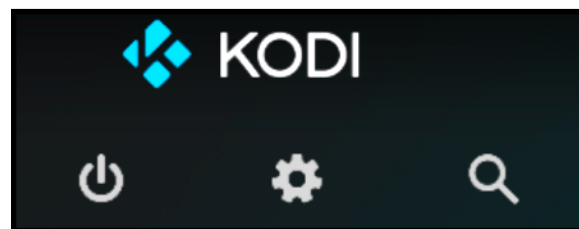

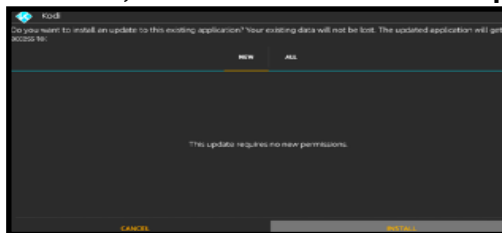

IF YOU DO NOT HAVE “APPSTARTER” CLICK THIS LINK FOR INSTRUCTIONS.

2. Go to “Updates” —> to the right of “Kodi” —> “Check for “Update”

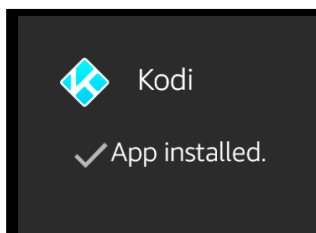

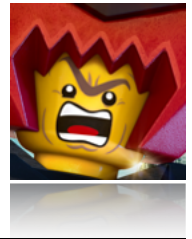

3. Select “Update to latest Version” and wait for the download to complete. Then navigate to “Install”, wait for the install to complete.

4. After the installation is complete select “Open”, the Kodi Software update is complete.

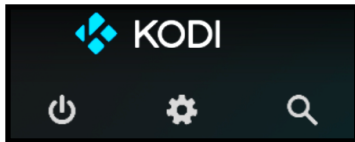

Nice Work!!

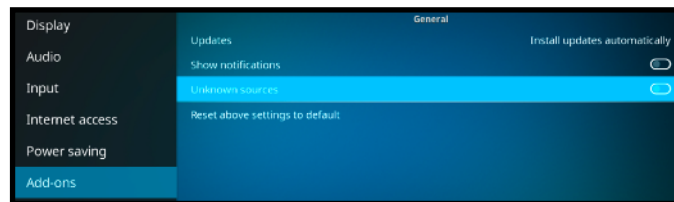

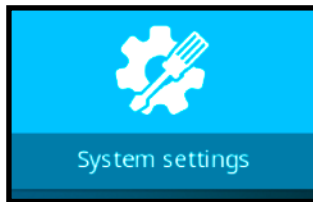

Part 3: Kodi Version **18.x (Leia)**, If less than 18 see **“Kodi software update”** Section.

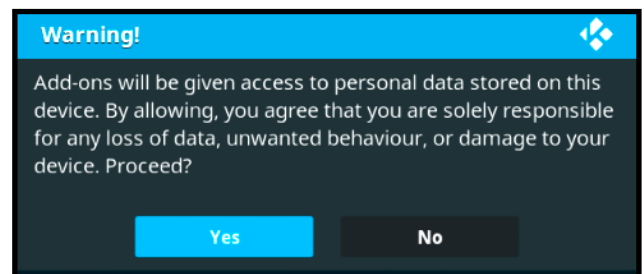

1. Launch **“Kodi”** —> Select **“Settings”** (cog or gear icon)

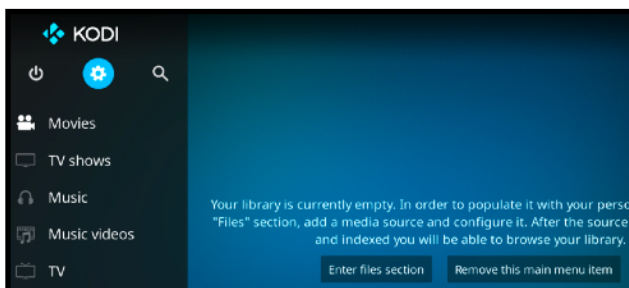

2. Select **“System Settings”** —> **“Add-ons”** —> Toggle **“Unknown Sources”**

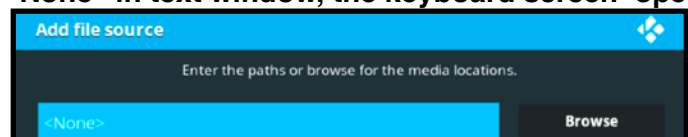

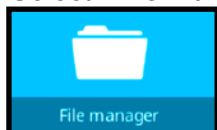

3. A warning pop-up will appear
“Add-ons will be given access to personal data stored on this device. By allowing, you agree that you are solely responsible for any loss of data, unwanted behaviour, or damage to your device. Proceed?” Select **“YES”**

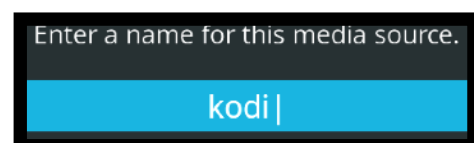

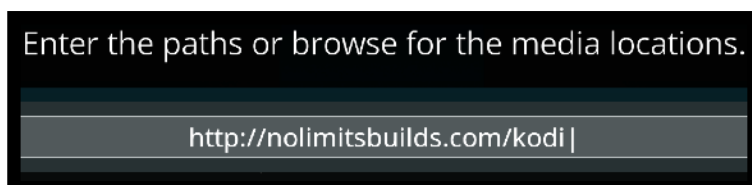

4. Back to the Kodi **“Home screen”** (press the back button several times) —> Select **“Settings”** (cog or gear icon)

5. Select **“File Manager”** —> **“Add source”**, Select **“None”** in text window, the keyboard screen open.

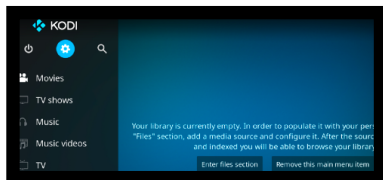

6. Type EXACTLY **<http://nolimitsbuilds.com/kodi>** the select ok **OK**
Select the box underneath **“Enter a name for this media source”**, Enter **“kodi”** and Select **OK**

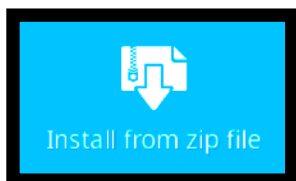

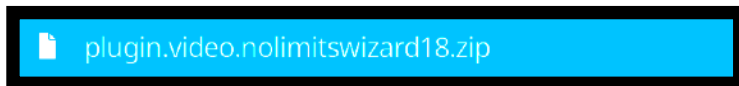

7. Back out to your **“Home Screen”** (press the back button several times) —> down to **“Add-ons”**

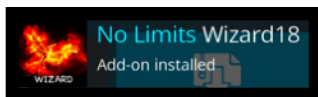

8. Navigate to **“Install from zip file”** —> Select **“kodi”**

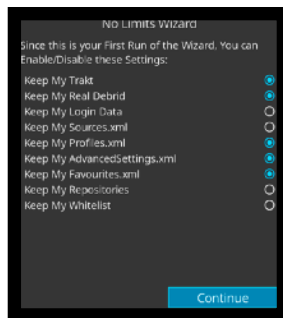

9. Click **“plugin.video.nolimitswizard18.zip”**

10. Now Wait for Supreme Builds install, after you see the message below, press the back button

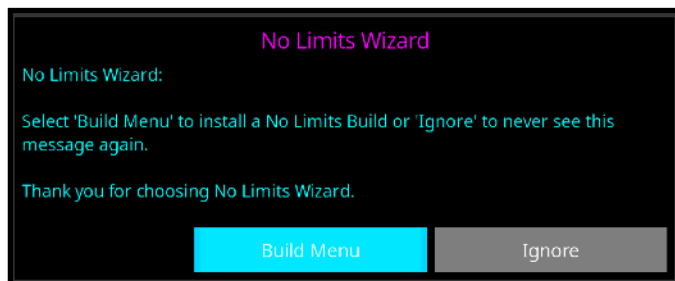

11. Select continue

Part 4: Installing the build using the “NoLimit” Wizard

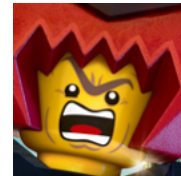

1. The **“Build Menu”** will pop up—> select **“Supreme Builds”**.

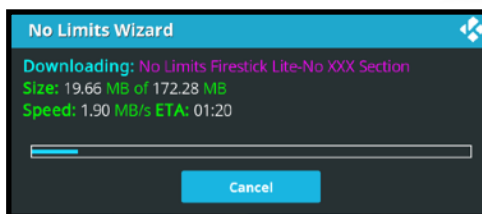

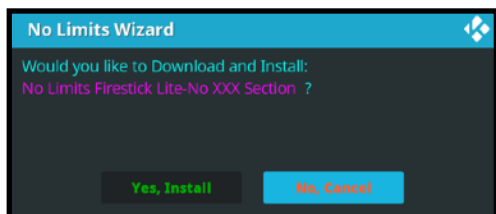

2. Select **“No Limits Firestick Lite -No XXX Section”** under **“SERVER 1”**, then select **“Standard Install”**, confirm Installation

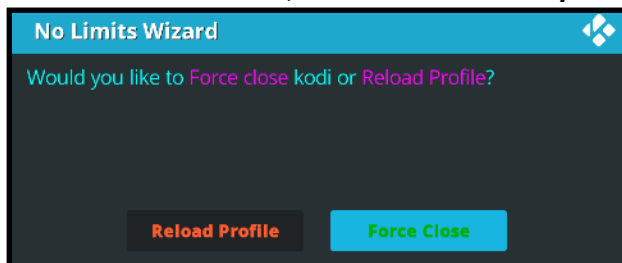

Amazon FireTV or Stick

3. Wait 5-10 minutes (could take much longer when server is in high demand) for the build to install.

4. Select "Force close", installation is complete, Launch Kodi.

5. On first launch, Kodi will update add-ons (This can take 5-10 minutes).
Use the search function for Movies and TV shows. Press the right arrow to find other ways to find movies, Exodus Redux is goods.

Magic Dragon is a great source for Movies and TV shows, however you may not find new releases in this add-on.
